

# Invitation to the International Workshop on **Bacterial Flagella and BioMachineries** Joint with Annual Flagella Meeting

1<sup>st</sup> circular

Dear friends and colleagues,

The International Workshop on **Bacterial Flagella and BioMachineries** will be held at South Garden Hotel in Taiwan on March 16 -19, 2020. This will be held also as the Annual Flagella Meeting, which was started more than 25 years ago just as a local meeting in Japan, but over the years we have invited many colleagues from abroad. Chien-Jung Lo at National Central University (Taiwan) planned to make the 25th Annual Flagella Meeting as an International Workshop, and all scientists working on or interested in bacterial flagella and biomachineries are welcome to participate. The meeting will be organized in a manner similar to the GRC-STIM and BLAST meetings. We very much look forward to having you join us at the meeting.
